Over 3 years of software development experience

Adaptability to new situations and perform under pressure

Exceptional performance in a team environment

Git

Java

Linux

Apache

Bootstrap

Angular / React

MySQL / SQLite

Node JS / Express JS

Server Administration

HTML / CSS / JavaScript

EXPERINCE

SOFTWARE DEVELOPER • JAN. 2019 – PRESENT

- Utilized Angular and React to create robust front-end applications.
- Developed REST APIs using Express JS to pass data between the front-end application, the webserver, and the database.
- Setup a webserver using Linux and Apache to host my various personal projects.
- Designed and implemented database schemas to store and retrieve data efficiently.
- Independently worked to learn new technologies and progress the project as needed.
- Organized and delegated assignments using a Scrum Board to maintain consistency and accomplish tasks.
- Made use of version control, such as GitHub, to track individual progress and collaborate with my teammates.

NORRED AND ASSOCIATES

SECURITY SUPERVISOR • MAY. 2014 – JAN. 2016

- Excellent communication with clients and management troubleshooting issues with a high success rate.
- Multitasking with many assignments that required high attention to detail.
