Utilizing my experience to be a substantial impact to your team.

## SKILLS

---

Adaptability to new situations and perform under pressure

Exceptional performance in a team environment

JavaScript

Node JS / Express JS

React

Linux

GitHub

MySQL / SQLite

Apache

Python / Bash

Docker

AWS

HTML / CSS / Bootstrap

## EXPERIENCE

---

### FULL STACK DEVELOPER • MYCURU • JAN. 2020 – PRESENT

- Compartmentalized the web application's technologies into Docker containers in order to maintain reliability and allow for scalability.
- Automate various tasks with Python and Bash scripts in order to increase my team's productivity.
- Make calls to the API in order to efficiently search for exactly what the user wants and display the results.
- Work with the team to design and implement the vision of the organization with my input and suggestions.

### SOFTWARE DEVELOPER • JAN. 2016 – PRESENT

- Setup a webserver using Linux and Apache to host various projects.
- Developed REST APIs using Express JS to pass data between the front-end application, the webserver, and the database.
- Designed and implemented database schemas with MySQL to store and retrieve data efficiently.
- Made use of version control, such as GitHub, to track individual progress and collaborate with my teammates.
