Utilizing my experience to be a substantial impact to your team.

SKILLS

Over 3 years of software development experience

Adaptability to new situations and perform under pressure

Exceptional performance in a team environment

Git

Linux

Apache

Bootstrap

Visual Basic

Angular / React

MySQL / SQLite

Node JS / Express JS

Server Administration

HTML / CSS / JavaScript

EXPERINCE

FULL STACK WEB DEVELOPER • JAN. 2019 – PRESENT

- Utilized Angular and React to create robust front-end applications.
- Developed REST APIs using Express JS to pass data between the front-end application, the webserver, and the database.
- Setup a webserver using Linux and Apache to host my various personal projects.
- Designed and implemented database schemas to store and retrieve data efficiently.
- Independently worked to quickly learn new technologies and progress the project as needed.
- Organized and delegated assignments using a Scrum Board to maintain consistency and accomplish tasks.
- Made use of version control, such as GitHub, to track individual progress and collaborate with my teammates.

A&C AIR CONDITIONING

SOFTWARE DEVELOPER / IT ADMINISTRATOR • MAY. 2016 – JULY 2018

- Built in-house tools from the ground up to increase productivity and streamline the company's workflow.
- Created a database using MySQL to store inventory and customer information.
- Used Visual Basic to design a simple, user-friendly UI for inputting data to the database.
- Provide remote and on-site maintenance for the client's computers, printers, and software issues.
